

# PMI 214 Notes - “Impact of Environmental Change on Vector-borne Disease Transmission”

Sam Fleischer - Speaker: William K. Reisen

(Professor Emeritus, DART Laboratory, Department of Pathology, Microbiology, and Immunology  
School of Veterinary Medicine, UC Davis)

October 6, 2016

- India has the highest population density
- Most countries in Africa have highest per-capita growth rate
- More people are living in cities than in rural areas
- Cities are hotter - more conducive to mosquitos
- temp is positively correlated to larval development and with transmission rate, and with death rate?
